Governments Hiding
100% Increase in Large Quakes

If you read articles on the USGS or British GS sites you think nothing is happening as to how many LARGE QUAKES are occurring all over the world. Even the PNAS is LYING.

While both Government agencies LIE and claim there is no increase a simple search of the USGS Database reveals an almost 100% Increase in large 7.5+ Magnitude quakes the past twenty years.

We've had almost 120 of these huge quakes the past 20 years while the preceding 20 years had only 60 or so.

Do the math, then ask why is the top government agencies in the USA and the UK in charge of monitoring earthquakes LYING to the public.

Here is proof the USGS is LYING

Here is proof the British GS is LYING

Almost 20 years ago THE PROPHET who calls himself SOLLOG warned in a time-stamp Usenet Post to Seismology groups that a huge increase in Great Quakes was starting. He noticed a slight up tick in large quakes at the close of the 1990's and warned the increase would continue. He was 100% Right.

Here is his Time-Stamped Warning in Usenet. Visit two four seven news dot net to obtain links mentioned in this podcast.

SOLLOG's book on Earthquakes and how 95% of Super Quakes occur in the same areas and are predictable as to their locations is at TRIANGLE OF FIRE.
