UFO Disclosure – Thee End Podcast – SOLLOG Podcast

00:00

[Music]

00:34

[Music]

00:35

this is SOLLOG that's SOLLOG com

00:43

following is a segment from one of my

00:47

podcast series you can find my podcasts

00:51

on SOLLOG .com and THEE END .com with three e's that's

00:57

th ee e ND commas well as Sol Adoni

01:04

commSol ad o ni dot-com I hope you

01:09

enjoy this segment of the so log podcast

01:16

this is SOLLOG this video is about the

01:24

UFO disclosure that occurred Memorial

01:28

Day 2019 you can go to my sites SOLLOG .com

01:33

and you can see the articles that

01:38

I've written about UFOs of the world

01:42

events now the big article appeared May

01:50

26 28 27 2019 is when all the other

01:57

media really started covering this New

01:59

York Times article and they got several

02:03

Navy pilots on the record with their

02:06

names stating about how they've been

02:09

seeing UFOs for a long time almost a

02:14

daily occurrence the article has a video

02:18

and this video was released almost

02:22

eighteen months before that by the New

02:25
York Times when they made disclosure

02:27
about other Pentagon today still has a

02:31
UFO program monitoring all the UFOs that

02:36
the military now see with updated radar

02:40
so whether you want to consider this

02:42
December 16 2017

02:47
Lozier or Nate 26 27 28 1901 the record

02:58
UFOs are real so all the skeptics that

03:02
have been saying UFOs aren't real that

03:06
they're explainable US military saying

03:09
these objects defy our understanding of

03:14
the law of physics the human was inside

03:18
one of these craft they would die they

03:20
would melt down because it's pulling

03:23
four to five hundred G's of force the

03:27
crafts are operated with no visible

03:29
energy fumes speculated that they might

03:34
be using in anti electromagnetic field

03:38
manipulator which would mean they would

03:41
defy the gravity of Earth is the 1,000

03:45
mile per hour spin that the earth makes

03:51
55,000 mile an hour orbit the earth mix

03:55
around the Sun the 500,000 mile orbit

04:00
the Sun makes around the Milky Way in

04:02
the one point two or three million mile

04:04
per hour moving up the Milky Way so it

04:09
appears the technology of these UFOs is

04:13
doing as i theorize in my theory

04:17
e-paper about the trick to space ships

04:25
is defying gravitational fields

04:29
electromagnetic fields and that way

04:32
you're standing still in space literally

04:35
while the universe moves by you so I

04:38
explained explained that theory years

04:40
ago I wrote a book about my own contact

04:45
with the grace that happened in 1995

04:54
my theory is that theory org which I'll

05:00
open up now for you so you can go to

05:02
theory II doubt org and you'll see a lot

05:09
of information about how Einstein and

05:14
Newton and everybody was basically wrong

05:17
and how they used the physical universe

05:20
so this is my work theory explain new

05:26
physics theories about how black holes

05:30
or electromagnetic fields they're

05:37
actually anti electromagnetic fields

05:39
they break down all matter and energy to

05:42
basic elements and then repels them back

05:45
into the galaxy that the black holes

05:48
power so anything gets near these fields

05:54
they revert matter and energy down into

06:02
protons and we've seen protons being

06:06
repelled by black holes so things were

06:08
being captured by black holes you

06:10
wouldn't see protons being repelled

06:12
we've also observed lots of energy being

06:15
emitted from black holes which is

06:18
impossible if you understand black holes

06:21
according to Hawking Einstein physicists

06:25
supposed to trap energy and matter and

06:30
not let anything out why are all these

06:33
black holes being observed in meeting

06:34
plasma that's energy so black holes emit

06:39
plasma black holes repel protons these

06:42
are the basic building blocks of matter

06:44
and energy in this universe so that's

06:48
how far off our understanding of physics

06:51
is we don't even understand what a black

06:55
hole is okay they're just the entire

06:57
electromagnetic field that recycles all

07:03
matter and energy so theory is some

07:08
that either eyes yes I'm one of the few

07:13
people that say they've had contact with

07:16
the greys I've said it 2500 years ago I

07:19
mean 25 years ago and in saying that I

07:25
had this contact I released prophecies

07:27
my visions of the future and judge for

07:31
yourself this around 60 of these

07:32
prophecies all time-stamped in the last

07:34
25 years and accuracy about future

07:38
events locations dates type of events no

07:42
one's ever been as accurate zyv man so

07:47
I've had contact clear visions of the

07:51
future and one of the visions of the

07:53
future that I've been talking about is

07:55
an asteroid movie I was led to believe

08:00
for many years that humanity would

08:04
basically become extinct beginning 2023

08:08
with the huge asteroid strike now that

08:13
disclosure has been made it is my

08:16
understanding through new visions that

08:21
humanity will actually be safe from this

08:26
extinction level event by UFOs

08:30
we have entered a new age where humans

08:34
no longer have any question about if

08:38
UFOs are real

08:39
so UFOs and the greys are going to

08:43
interfere in 2023 we're gonna save this

08:47
planet from having a major asteroid

08:50
strike that I've been warning about for

08:52
25 years and that's the good news the

08:57
bad news is that as humanity adjusts to

09:01
the fact that humans no longer the most

09:04
advanced race on this planet there's a

09:08
more superior technology in the hands of

09:12
the greys well most of humanity's gonna

09:16
have a hard time adjusting to a

09:18
second-class citizen very

09:20
technologically

09:22
of humanity so you're gonna see a

09:25
complete crash of all the stock markets

09:29
all the currencies all the crypto

09:30
exchanges everything is now irrelevant

09:34
due to this disclosure so that's why the

09:38
greys were trying to avoid such an

09:42
impact but if the interference is not

09:47
allowed to happen then there's basically

09:50
be no life on this planet and the reason

09:53
there'd be no life on this planet

09:55
without the greys interference if you go

09:57
to my site GREPA .org you see many years

10:02
ago I put out a paper explaining to

10:08
humanity that grep is the global

10:11
renewable energy production agreement

10:14
that's telling you man Andy look all

10:19
your existing energy is bad you have to

10:22
get green Alexandria okay SIA Cortez is

10:27
the first politician in the United

10:30
States that's basically signed on to

10:32
this agreement saying that biggest

10:36
danger is this energy she doesn't

10:41
understand that it's all about this

10:43
potential asteroid striking nuclear

10:45
power points the asteroid had been

10:48
allowed to hit the power plants that are

10:50
around the world on the coastal lines of

10:56
the various continents would have

10:59
resulted in hundreds of Fukushima events

11:03
happening simultaneously in the planet

11:05
would have died so the planet could not

11:09
survive the tsunamis of an asteroid

11:13
strike due to the fact that so many

11:16
nuclear reactors would have been leveled

11:18
by the tsunamis are you talking about

11:21
tsunamis like unfathomably hi you know a

11:25
mile or two high up in the air that goes

11:27
inland for you know a couple hundred

11:28
miles they've washed over the

11:31
Appalachian Mountains okay so Esther

11:36
tsunamis have hit before they're extinct

11:41
hi extinction-level events but the

11:44
planet would have had nuclear meltdowns

11:48
all over the place and then a death so

11:50
so that's why the greys and how since

11:53
they've been disclosed by the US

11:55
military will be interfering in the

12:01
history of this planet so we won't have

12:06
an asteroid strike that destroys all

12:11
life on Earth after 2022 so that's the

12:17
prophecy that my life's work was based

12:20
around warning humanity look you gotta

12:22
get rid of these nuclear reactors they

12:25
can't handle tsunamis in between now and

12:29
the asteroid strike you're probably

12:31
gonna see another earthquake or two or

12:34
even more go to great quakes dot-com

12:39
that's my earthquake prediction site

12:40
you'll see I've shown how 95% of great

12:45
quakes occur are only three lines so

12:49
there you see Asia North America South

12:51
America when you use these three lines

12:53
which were solstice lines I call it the

12:56
triangle of fire you can see these big

12:59
circles that's the last hundred years of

13:01
major major earthquakes so they all

13:04
occur like over 8.5 on these lines the

13:08
only exception was one up in Tibet in

13:09
the past hundred years so one out of

13:14
20-something quakes over 8.5 the last

13:17
hundred years didn't occur on these

13:19
three lines 95% did so people look for

13:23
another major quake along these three

13:25
lines they create tsunamis often as was

13:29
done in 2004 with the Indian Ocean

13:33
tsunami that killed a quarter million

13:36
people Fukushima event 2011 was a result

13:40
of an earthquake that created a tsunami

13:42
so tsunamis and nuclear power plants

13:47
along these coastlines and you'll see

13:49
there's a lot of

13:50
nuclear power plants along this triangle

13:52
there's also a lot of nuclear power

13:54
plants along the eastern seaboard

13:58
same thing with Western Europe lot of

14:01
power plants that are subject to tsunami

14:04
zones so people you're probably gonna

14:09
see another if not several tsunami

14:13
related nuclear incidents which will

14:16
force humanity get rid of nuclear

14:19
technology so you can go to my site

14:22
grandpa and explain you have free clean

14:24
energy for the world you followed my

14:26
outline the great quakes see more

14:30
information about where super quakes

14:32
gonna be striking you know we get rid of

14:38
these nuclear reactors that are in these

14:40
zones you know see the new laws of

14:44
physics physics I've revealed in theory

14:46
eat go to asteroid dot Moby and see what

14:50
I had written about the asteroid that

14:52
was supposed to destroy all life on

14:54
Earth

14:55
now greys are gonna interfere and not

15:00
allow it to strike the earth and kill

15:02
everything and my site is so log column

15:05
that says so I low low G and go to it

15:07
and my writing son what's happening in

15:11
the world are there my prophecies are

15:12
there a lot of my videos and books and

15:15
everything for their this was so long

15:18
have a great day and welcome to the age

15:21
of UFO disclosure there is no longer a

15:25
question of if you believe they are a

15:29
reality UFOs are real in the US military

15:33
system this was SOLLOG have a great day

15:42
[Music]
